

Two lights provide better illumination within the oven cavity, so you can keep control of the cooking process.

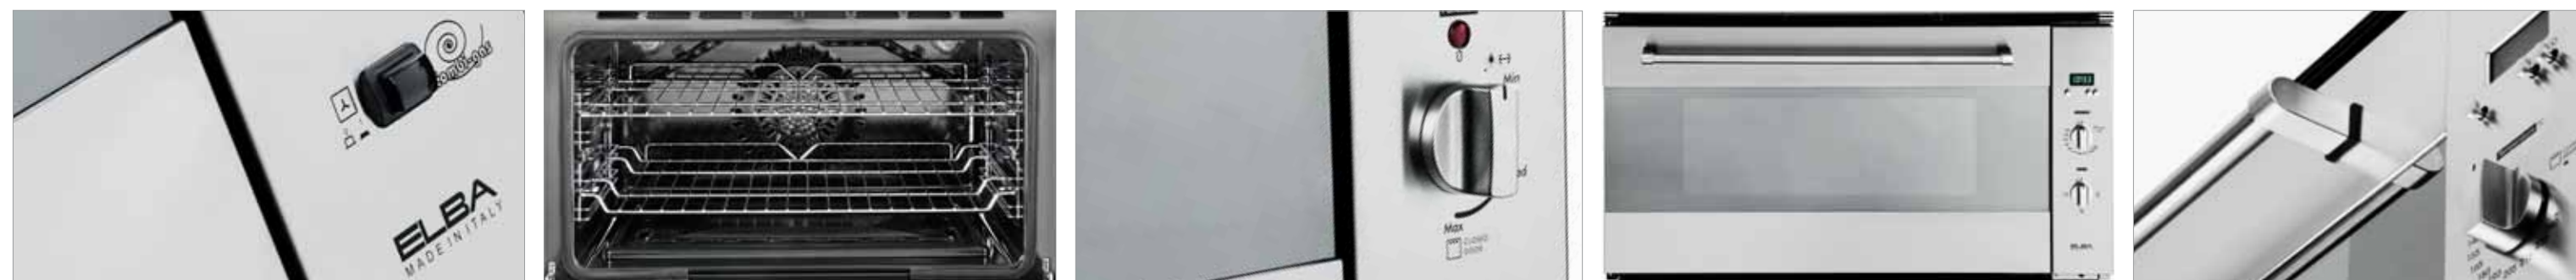

Electronic digital clock with minute minder.

Closed door grilling to help food retain natural juices, moisture, enhancing flavour and keeping annoying flare-ups to a minimum. Closing the door also ensures that heat is distributed evenly and food is properly cooked and a more even crispy effect. For those of us who are conscious of the environment, it also ensures that heat is used more efficiently. It is also an additional safety measure of a household with children.

The forced air convection mode can be activated only with the lower gas burner. Suitable for delicate dishes that require heat concentration at the base, whilst gently cooking the top.

The masterpiece of built-in **gas ovens**, a new generation of products, in the size of 90cm for the most demanding gourmets. The design is in the sign of continuity with Elba's Line, featuring side controls, cool door and seamless cavity.

The **forced air convection** gives further flexibility in terms of functionality and the best cooking performance.

Innovative cooling tangential fan system to keep the door and the front panel at remarkably low and safe temperatures.

The oven cavity has increased in size providing more volume with a huge interior capacity, whilst still maintaining the existing external dimensions and featuring side controls. The accessories, lateral supports and grill element shape, have been designed in order to maximize the internal usable volume.

The seamless cavity is fitted with a friendly dark grey enamel interior, ensuring maximum energy efficiency and providing an easy to clean surface.

The inner door frame, with graceful curves and elegant smooth finishing, features **soft hinges** to ensure easy opening and closing.

OVEN FUNCTIONS

Oven light
Dual lighting eliminates guesswork while cooking with more precise control and better feel.

Lower gas burner
Ideal for use at the end of a cooking cycle to brown the base of your food.

Grill
Fast, extremely powerful grill ensures best grilling and browning results.

Minute minder

Rotisserie

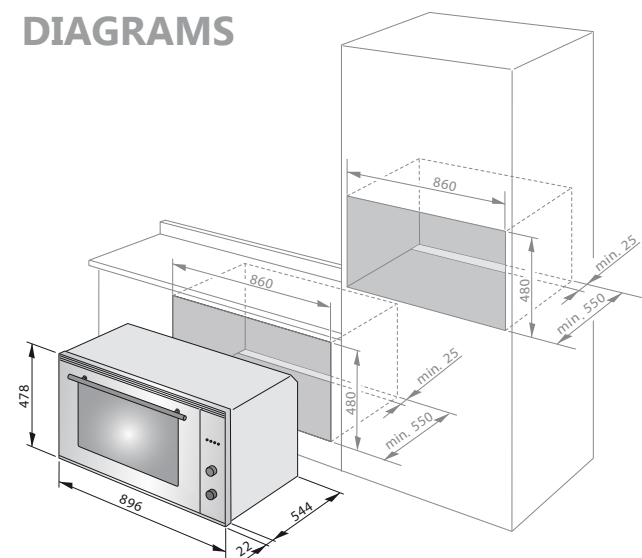

Forced air convection with lower gas burner
This function ensures you optimal results for cooking dishes that need a higher cooking in the lower side.

Combi-gas
Gas ovens with electric grill and radial fan combine the performances and convenience of a gas oven with the flexibility of an electric oven.
